Paul Beaudry & Pathways Americas

"...[a] joyous collection of different musical **flavours** that make the album extremely fun to listen to...it sounds just like live music, lively, strong and communicative as only the real thing can be... Not even a trace of artificial or **electronic** sound! Just the illusion of real instruments playing somewhere for you... The piano parts deserve a special mention, because the sound is extremely realistic, clean, natural... I don't know whether this is the **perfect** jazz recording, for sure it is one of the best I've ever heard. There are several excellent jazz recordings (especially from Reference Recordings and Chesky) but nothing comes close to Americas in terms of realism and presence effect. Need I say more?"
